

Installation Dual-Boot environment (Android/Win7) on CTFPAD-2

In this packet you will find:

- SwitchApp-Android : An App which allows you to switch to Windows 7 directly from Android.
SwitchApp-Windows 7 : Pendant to Android-Version
- Clonezilla-live-ctfpad2android : Image for installing the Dual-Boot-Android environment (incl. Android OS) on the CTFPAD-2 by CD-drive or USB-stick

Installation base-system (Dual-Boot-Android environment)

Burn the image „Clonezilla-live-ctfpad2android.iso“ on a CD and boot CTFPAD-2 system with it.

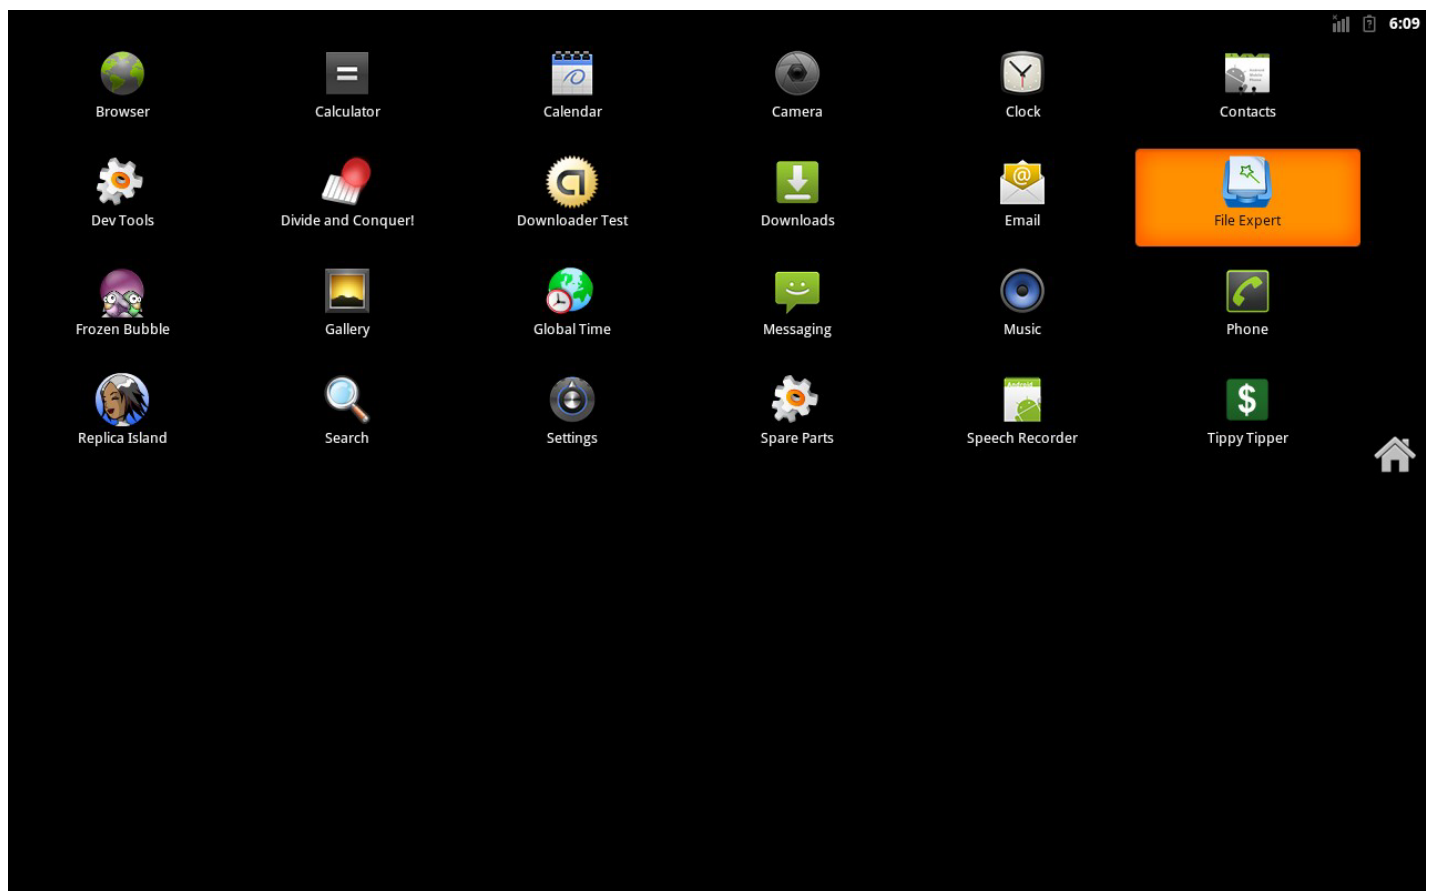

The image installs the base system directly on the SSD drive of the pad.

Then you can either start Android or install Windows 7. For Win7 installation please choose the biggest partition (should be ~21GB) as target.

Alternatively you can boot the image from an USB-Stick.

For this please have a look on this manuals <http://clonezilla.org/liveusb.php>
